

# User Manual DGT1001 (English)

## Introduction

Congratulations on your purchase of this high quality GameTimer from Digital Game Technology. This GameTimer brings extra excitement and dynamics to any game played between two players. With its handy top buttons and large display, the DGT1001 is very easy to program and intuitive to use. It features a, one period countdown and ,one period, count-up timer which can be set between 1 second and 9 hours and 30 minutes. The clock switches from one player to the other player when one of the two levers is pressed.

Use the GameTimer with a wide variety of games such as Chess, Draughts, Checkers, Poker, Scrabble™, Lost Cities, Party & Co, Dominoes, Boggle, Settlers, Carcassonne, Trivial Pursuit, Monopoly or any other two-player games. Just switch it on, set the play-time as desired and start the clock. Let the game begin!

## Battery

The DGT1001 operates on one AA battery. If the GameTimer will not be used for a long period, we recommend removing the battery to avoid possible damage caused by a leaking battery. When the battery symbol  is shown in the bottom right corner of the display, the GameTimer can still be used for several long games though it is recommended to replace the battery by a new one.

## Important

- The battery included is non-rechargeable and should not be recharged.
- Do not use rechargeable batteries in this product.
- Place the battery in the battery compartment with the correct polarity.
- A dead battery should be removed from the product immediately.
- Never short circuit the battery.

## DGT1001 Timer Operation

### Control Buttons

	This is the power button to switch the GameTimer on or off. To switch off, keep the button pressed down for 1 second.
	Use this button to increase the game time before starting a game. Keep pressed down for quick setting.
	Use this button to decrease the game time before starting a game. Keep pressed down for quick setting.
	Use this button to start or stop the clock. Note that the clock can also be started by pressing the button "Left" or "Right".

### Display Layout

## How to set the DGT1001 GameTimer

- Press the  button. The display shows the last used setting. The  icon is visible on the display to indicate that the GameTimer is not running.
- The game time can now be set to one of the pre-set time controls between 0:00:00 and 9:30:00 using the  and  buttons.
- The clock can now be started either by pressing the  button or by pressing "Left" or "Right". Pressing the  button will start the left clock (indicated by flashing colons). Pressing the lever on either side will start the clock for the opposite player.
- The  symbol appears indicating that the clock is running.
- Pressing the  button pauses the GameTimer. The  symbol is now displayed.
- To resume, press the  button or button "Left" or "Right".
- When a player reaches zero, the beeper sounds and the corresponding flag is shown. The clock will now continue in the up-count mode.
- Restart the GameTimer for a new game by turning the power off and on by using the  button.
- To start a game in up-count mode, set the starting time to 00:00:00.

## Setting the game time

At the start of a game both players receive the same amount of time. The GameTimer can be set as per below time intervals:

Game time per player:	Game time interval options:
Between 0 and 1 minute	Intervals of 1 second
Between 1 and 10 minutes	Intervals of 30 seconds
Between 10 and 30 minutes	Intervals of 1 minute
Between 30 minutes and 2 hours	Intervals of 5 minutes
Between 2 hours and 9 hours and 30 minutes	Intervals of 30 minutes

## Flag behaviour

On the side of the first player that passes zero, i.e., runs out of time, the flag will be displayed and the  sign will appear indicating this clock is now counting up. When the second player passes zero, only the  sign is shown and not the flag. This makes it possible to always establish which player reached zero first, i.e., ran out of time first. If zero time is set as the starting time the clocks will start in up-count mode displaying the  sign on each side.

## Beeper behaviour

The beeper can be switched on or off by keeping the  button pressed down for 2 seconds when turning on the GameTimer. The  symbol is displayed when the beeper is activated. With sound activated, there is a short beep when 10, 5, 4, 3 and 2 seconds remain and a longer beep when 1 second remains until zero is reached. In the up-count mode the beeper does not sound.

## Maintenance and cleaning

Your DGT1001 GameTimer is a durable well-made product. When treated with care, it will give you many years of trouble-free performance. To clean the clock, a slightly-moistened soft cloth should be used. Do not use abrasive cleaning liquids. Be aware that sunlight may cause discoloration of the GameTimer.

## Warranty conditions

Digital Game Technology guarantees that your GameTimer complies with the highest quality standards. If, despite our care in selecting qualified components, materials, production and transport, your GameTimer nevertheless shows a defect during the first 24 months after purchase, you should contact the retailer where you obtained the product. To claim the warranty you may be asked to present proof of purchase. When a defective product is returned, please give a detailed description of the problem and the serial number of the GameTimer.

The warranty is only valid if the DGT1001 has been used in a reasonable and prudent manner as intended to be used. The warranty is voided if the DGT1001 has been misused or if any unauthorized repair attempts were undertaken without prior written consent from Digital Game Technology.

## Technical specifications
